

Off-Highway Drive and Motion Technologies **Product range**

Fully optimized Spicer® drivetrain systems and Brevini® motion systems, backed by global expertise and a worldwide network of support.

People Finding A Better Way®

Founded in 1904, Dana Incorporated is a world leader in highly engineered solutions for improving the efficiency, performance, and sustainability of powered vehicles and machinery. Dana supports the passenger vehicle, commercial truck and off-highway markets, as well as industrial and stationary equipment applications.

We maintain a competitive advantage in the marketplace with a commitment to delivering on the five dimensions of our enterprise strategy – leveraging the core, strengthening customer centricity, expanding global markets, commercializing new technology, and accelerating hybridization and electrification.

Employing more than 30,000 people in 33 countries, on six continents, our people work tirelessly to deliver long-term value to customers around the world. We have earned our position as a trusted, top-tier supplier by collaborating with customers to develop, integrate, and support the innovations required to improve vehicle performance and efficiency.

Each day, in both large and small ways,
Dana is defined as People Finding A Better Way.

Brevini® Brand Expands Dana Portfolio

A seamless complement to our existing offerings, Dana acquired the power-transmission and fluid power businesses of the former Brevini® Group S.p.A. in February 2017. This acquisition increases Dana content on off-highway and stationary industrial equipment, expands our product portfolio with adjacent technologies, and gives Dana the unique ability to manage the power to both move equipment and perform its critical work functions.

In addition, tracked vehicles and a broader range of industrial equipment are now part of our company's addressable market with a platform of proven technologies that can accelerate hybridization and electrification initiatives.

Corporate Business Units

Dana serves global light vehicle, medium/heavy vehicle, and off-highway markets through four business units – Light Vehicle Driveline Technologies (Light Vehicle), Commercial Vehicle Driveline Technologies (Commercial Vehicle), Off-Highway Drive and Motion Technologies (Off-Highway) and Power Technologies, which is the center of excellence for sealing and thermal management technologies that span all customers in our on-highway and off-highway markets.

Brevini® products support a broad spectrum of motion system applications in working functions on all types of mobile off-highway machines, as well as stationary industrial sectors. By adding Brevini® motion systems to our range of Spicer drivetrain systems, we now have a full array of mechanical, hydraulic, and electronic advanced technologies to support customer application designs.

Dana's engineering capabilities, broad product range, and focus on collaboration with customers allow us to deliver optimal solutions with the performance required to support high levels of efficiency. As a single supplier with a unique portfolio of Spicer® drivetrains and Brevini® motion systems, we can also help to optimize supply chains.

Off-Highway

Drive and Motion Technologies

As an innovation leader in off-highway drive and motion systems, Dana's full breadth of solutions also includes thermal management and engine sealing technologies.

Off-Highway brands

Drivetrain Systems

Motion Systems

Thermal Management

Sealing

Off-Highway Sectors

Dana leverages our global expertise to engineer the most advanced, customized product solutions for developed and emerging markets. Our drive and motion products serve a wide range of demanding industries with applications for wheel and track drives, along with stationary machines.

MOBILE

Agricultural Segment

Our products are engineered to support increased crop yields, optimized harvesting operations, lower emissions, improved operator safety and comfort, and reduced total cost of ownership while complying with evolving emissions standards.

Construction Segment

Integrated drive and motion systems from Dana enhance construction equipment performance, efficiency, and productivity with a range of solutions for vehicles ranging from 3 to 50 tonnes (4 to 55 tons). Spicer axles, wheel drives, transmissions, driveshafts, and Brevini motion products are integrated with the most advanced technologies for improved machine operation on any job site, in any condition.

Mining and Forestry Segment

Dana designs complete drive and motion systems to meet increasing industry demands for automation and productivity, coupled with high safety standards. Our solutions are specially engineered to maximize vehicle performance in extremely harsh environments.

Material Handling Segment

Our custom drive and motion systems enhance material-handling vehicle performance, productivity, and power. Spicer transmissions, axles, and driveshafts are designed to work seamlessly in any vehicle to allow operators to engage, lift, and transport heavy loads with more precision.

INDUSTRIAL

Industrial Segment

Dana's portfolio of advanced motion technologies has been engineered to support increased productivity and reliability, lower emissions, improved operator safety and comfort, and reduced total cost of ownership.

Leading Mobile Market Technology

Drivetrain Systems

Spicer® Driveshafts

Handles added input torque and heavy loads

Designed for longer life, minimal maintenance and lower operating cost

Spicer® Axles

Differential lock and mounting options
2- or 4-caliper dry disc brake per axle

Viton® rotating radial lip seals ensure high-integrity sealing

Spicer® Planetary Travel Drive

Combined with a pump drive in hydrostatic power transmission

Epicyclical gearbox reduces complexity while enhancing output

Flexible and robust design

Spicer® Transmissions

Lift capacities up to 120 tonnes

Full reversing range shift and full powershift options

Converter and transmission packages available

Spicer® Electronic Controls

Enable communication between driveline components

Best-in-class controls optimize productivity, maximize life, and reduce maintenance

Our mobile product range includes Spicer® transmissions, axles, wheel drives, driveshafts, tire-pressure management systems, and hydraulic-hybrid solutions.

In addition, Brevini® winches, slew drives, proportional directional valves, and other motion products are specifically developed to perform high-efficiency working functions.

Motion Systems

Brevini® Slew Drive

Designed for pinion and slewing ring drives

Planetary unit design optimizes torque performance and radial load capacity

Brevini® Winch

Designed to lift or pull loads in mobile, marine, and offshore applications

Planetary gearbox design uses the input power of a hydraulic or electric motor

Brevini® Proportional Directional Valves

Available in versions for fixed and variable displacement pumps

Remote, electronic operation

Provides smooth controllability to perform work functions

Spicer® Drivetrain Systems

The drivetrain solutions you need,
backed by global expertise and support.

Spicer® Axles

Spicer® axles are designed to deliver maximum performance for a variety of agriculture, construction, material handling, mining, and forestry machines. Our axles lines deliver the reliability, power, and performance needed in rough terrains. With a wide variety of options and modular configurations, we can further customize each product to suit regional preferences and existing machine systems

Spicer® Transmissions

Dana offers a full range of Spicer® hydrostatic and hydrodynamic transmissions and torque converters. The off-highway transmissions can be specified with electronic control systems to enhance performance even further. A range of options enable precise inching, eco-drive, power drive, and overlap control.

DanaRexroth® Transmissions

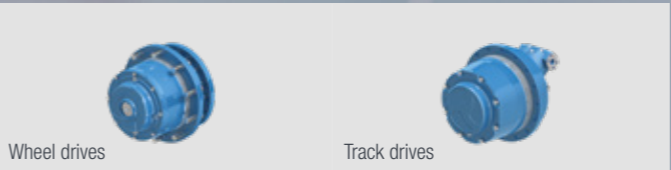

Through a joint venture with Bosch Rexroth, Dana delivers hydromechanical variable transmissions, which combine mechanical and hydrostatic travel drives to maximize fuel savings up to 35 percent.

Dana leverages its global expertise from all markets to engineer the most advanced, customized product solutions for customers in both developed and emerging markets. By working directly with our engineers, we can improve the productivity and fuel efficiency of your vehicles with Spicer® transmissions, axles, driveshafts, wheel and track drives, tire pressure management systems, and hybrid-electric solutions.

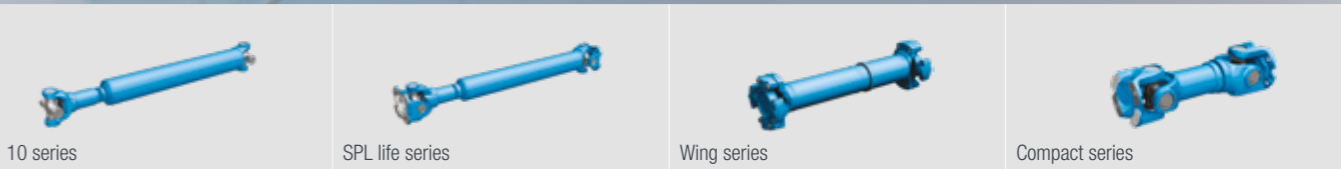

Spicer® Wheel and Track drives

An ideal solution for mobile applications, the unique Spicer® planetary design offers cost benefits savings and other advantages. Plus, our wheel and track drives are available with a full package of related Brevini hydraulic motors and valves that can be customized to meet any requirement.

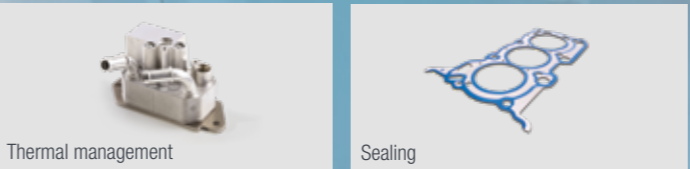

Spicer® Driveshafts

With more than a century of knowledge and expertise, Dana engineers the most robust driveshafts available for the off-highway market today. Equipped with a variety of end-fittings/flanges and maintenance-free options, our extensive driveshaft lines can handle rough terrains, heavy loads, and added input torque to increase your productivity and reduce operating costs

Engine technologies

Dana offers a range of engine technology solutions for the entire off-highway industry including agricultural, construction, forestry, and mining. Our products improve work productivity by increasing duty cycle loads per hour. The decreased downtime leads to higher profitability in high-pressure situations. When vehicles are working continuously, machines require the latest engine technology for superior protection and durability – turn to Dana’s engine technology for reliable solutions.

For more technical informations about Spicer® Drivetrain Systems please visit our product selector tool:
www.danaproductselectiontool.com.

Advanced and Reliable Technologies for **Industrial Application**

Brevini® products support a broad spectrum of fluid power and power-transmission applications in asphalt and concrete production, civil engineering and infrastructure, marine and port equipment, material handling, pulp and paper production, sugar refining and food processing, along with mining and tunneling. In addition, the product range includes highly engineered components used in extrusion, compounding, and injection molding for plastic and rubber production.

Industrial Sectors

Bulk materials

Dana has an extensive range of gearboxes with torque ratings of up to 3 million Nm. Our qualified, experienced engineers provide optimum solutions for heavy duty applications and our service team deliver support for the life cycle after supply.

Marine

Dana Brevini® planetary gearboxes have been used in the Marine and Offshore Market for many years. In applications such as winches and cranes we are able to support the correct specifications and certifications required in this market. Combined with our range of fluid power solutions we are able to work with OEM's to provide safe and reliable solutions for their applications.

Heavy industry and steel

Dana Brevini® gearboxes have been used in heavy-duty operations from mines to steel production for more than fifty years. Our portfolio of advanced technologies has been engineered to support increased productivity and reliability, improved operator safety, and reduced total cost of ownership.

Industrial and stationary equipment

Our range of gearboxes and hydraulic products offer reliable solutions for all equipment within the industrial and stationary sectors. Products guarantee high productivity and low maintenance costs and are backed by aftermarket support and service.

Environment - renewable energy

Dana Brevini® Yaw and Pitch drive gearboxes are used by many of the major wind turbine OEM's. We provide input and offer sustainable and reliable solutions to meet requirements and our service division has a vast experience of servicing gearboxes for the main drives as well as the Yaw and Pitch.

Plastic and rubber

Dana Brevini® and PIV® offer a wide range of products including single-screw and twin-screw extruder drives, rack and pinion drives for injection molding machines, planetary gearboxes, and helical and bevel helical gearboxes.

Brevini® Motion Systems

The most advaced Fluid Power
and Power Transmission technologies

Brevini® Fluid Power

Dana's portfolio of hydraulic technologies is built on four decades of global proficiency in fluid power from the Brevini® brand.

GWB® - Industrial driveshaft

Driveshaft for Industrial applications

GWB® - Industrial Driveshaft

Since 1946, Dana's line of GWB® driveshafts have been recognized as the global standard for technical innovation, quality, and performance for industrial applications. GWB® driveshafts are built on a deep, long-term understanding of applications in the steel, rail, marine, paper, and recycling industries. Manufacturing operations in Germany are supported by Dana's global network of research and design, distribution, and aftermarket operations.

PIV® - Extruder drives

	
Twin screw extruder drives	Single screw extruder drives

Brevini® Power-Transmission

With global expertise in the design and manufacturing of high-efficiency technologies, the Brevini® Power-Transmission line includes planetary and helical gear units, gear motors, and winches, along with planetary gearboxes and industrial power transmissions. Supported applications include on-and offshore equipment, green technologies, mining, heavy industries, and earthmoving.

PIV® - Extruder Drives

The result of a partnership between PIV® Drives in Germany and Dana's Brevini® Power-Transmission headquarters in Italy, PIV® products have a reputation for high quality, reliability, exceptional performance, and long life. The complete PIV® product portfolio includes single- and twin-screw extruder drives.

Global Strength

One of the ways we create value is by positioning our technical and manufacturing resources where customers need us globally. Today, that's 33 countries on six continents.

To help customers achieve success in today's ever-changing market conditions, top-tier suppliers must have a global perspective on megatrends and technology advancements that can be adapted and deployed to meet local requirements and end-user expectations. At Dana, we continue to deepen our commitment to global markets by making investments that optimize our already substantial footprint, extensive market knowledge, and established supply chain.

Dana's worldwide leadership, strengthened by the international presence of Brevini®, is the key to serving over 5,000 clients around the world. We bring our global expertise to the local level with technologies customized to individual requirements through a network of strategically placed technology centers, manufacturing locations, and distribution facilities.

Culture of innovation

Since our introduction of the automotive universal joint in 1904, we have been focused on technological innovation. Every day, Dana employees around the world work together to leverage our shared insight, developing the most innovative technologies that provide more value for our customers and solve their biggest challenges.

Innovation drives growth, and our ever-evolving products and technologies provide customers with cutting-edge solutions, address end-user needs, and capitalize on key market trends. In 2017, Dana engineers achieved a new milestone: the company's 10,000th patent, granted for a Long®-brand heat exchanger with an integrated thermal bypass valve.

Our strength is being over six continents thanks to our global logistic network

GLOBAL PRESENCE

We have the ability to deliver products that meet specific regional requirements through our vast network of nearly 100 engineering, manufacturing, and distribution facilities covering six continents. This global logistic network ensures maximum flexibility and punctuality in the delivery of the products.

DANA SERVICE AND ASSEMBLY CENTERS

Customers can capitalize on the specific market knowledge and engineering expertise of 30 regional former Brevini® subsidiaries - now known as Dana Service and Assembly Centers - to provide product customization and service.

ENGINEERING, RESEARCH AND DEVELOPMENT

We engage in ongoing engineering activities as well as research and development to improve the reliability, performance, and cost-effectiveness of our existing products. We are also focused on the design and development of innovative products that meet customer requirements for new applications. Our objective is to be an essential partner to our customers and we remain highly committed to offering superior product quality, technologically advanced solutions, world-class service, and competitive prices.

Electrification

Dana's comprehensive strategy for electrification in off-highway markets begins with a foundation of enabling original-equipment manufacturers to accelerate their hybrid and electric vehicle development programs. We offer a series of market-ready modular hybrid- and electric-drive systems that can fit into existing vehicle design envelopes and provide OEMs with effective, low-risk, quick-to-market solutions. These products can be connected to traditional Spicer wheel drives, track drives, axles, and transmissions to deliver hybrid or electric functionality. A wide selection of Brevini® motion products to support the unique power distribution requirements of hybrid and electric off-highway vehicles are also currently available.

Technologies Customized to **Every Part of the Globe**

With a global presence in 33 countries, Dana incorporated boasts more than 100 engineering, manufacturing, and distribution facilities. Our worldwide network of local service centers provides assurance that each customer will benefit from the local proximity and responsiveness that they need.

About Dana Incorporated

Dana is an integral partner for virtually every major vehicle and engine manufacturer worldwide. We are a leading supplier of drivetrain, sealing, and thermal technologies to the global automotive, commercial-vehicle, and off-highway markets. Founded in 1904, we employ thousands of people across six continents.

About Dana Off-Highway Drive and Motion Technologies

Dana delivers fully optimized Spicer[®] drivetrain systems and individual product solutions to customers in construction, agriculture, material-handling, underground mining, and forestry markets, plus Brevini[®] motion systems for machine working functions.

Learn more about Dana's complete range of drive and motion systems for off-highway vehicles and industrial machines at dana.com/offhighway.
